

FAASTeam presents:

Approach Plate Lunch

Instrument approach plates pack an extraordinary amount of information into a very small space. They contain all the information you need to approach an airport you can't see, and procedures to safely land there – all on a 5.5" by 8.5" sheet of paper. CFI Jason Miller will discuss approach plates for Concord and Salinas, which are great for IFR training or practice. What exactly is a LDA approach? How do you identify the VDP? He will focus on what is unique or challenging about each approach along with potential gotchas. Jason Miller has been teaching flying full time for the past 12 years. He is the creator and host of the popular podcast "The Finer Points of Flying." If he's not in the air or hosting a podcast session, Jason can be found authoring books or iOS training applications. San Carlos Flight Center was voted Best Flight School in the US in the 2013 AOPA Flight Training Excellence Awards. We are committed to promoting safety in general aviation through our evening safety seminar programs. For more information about this and any of our weekly seminars, please visit <http://sancarlosflight.com/activities-and-events>.

Event Details

Sat, Aug 29, 2015 - 12:00 PDT
